11-15 CDBAC 16-20 ACDCB 21-25 BCABD 26-30 DADAC

PART III

PART IV PROOF READING

& ERROR CORRECTION (15 MIN) (1) Looked→Looking (2) and→but (3) complimentary→compliment (4) it→去掉it (5) very→too (6) ^which→in (7) specially→especially或particularly (8) for→about (9) aspect→case (10) been→去掉been

PART V

SECTION A

In order to provide the majority of plant-lovers with more opportunities to closely appreciate the beauty of camellia, the area of the Camellia Show is extended to the whole garden so that it can bring more convenience for the visitors.

The Camellia Show takes over two months, in which more than 200 various camellias will be presented successively.

SECTION B

PART VI WRITING

My Views on the Sharing Economy The sharing economy refers to the economic pattern in which people share access to resources, such as goods, services and data. This newly emerging trend would be impossible without the development of technology. It is the Internet that makes the sharing cheaper and easier and helps to strike a balance between supply and demand. Time magazine has listed the sharing economy as one of the “10 ideas that will change the world”. As far as the comment is concerned, I cannot agree with Time more.

As one of the greatest benefits of the digital age, the sharing economy arises from our oldest instinct as human beings. There is always an urge for us to connect with others, especially in an era when families are scattered and we do not really know the people who live nearby. It has been said that “Joys shared with others are more enjoyed.”However, in my eyes, the resources shared with others are more beneficial to our society.

On the one hand, sharing economy leads to a more efficient use of resources. Some items are expensive to buy but widely owned by people who do not make the best use of them. Occasional sharing may provide extra income for the

owners and can be less costly for the borrowers. If managed well, a win-win situation is achieved for both parties in the process. Besides, sharing economy contributes to environmental protection.

Take accommodation for example. The more hotels are built, the more resources are required, which might in turn result in a decrease in arable land and public green space. On the other hand, the transaction cost is reduced due to the use of Internet and various apps. With a smart phone in your hand, it is not difficult to find a potential host in the neighboring area. People are meeting increasingly on screens, discussing online and purchasing goods domestic and overseas, paying through Internet payment system.

To summarize, although the sharing economy is not perfect at present because of concerns in insurance, legal liability, safety and the like, I believe, quite firmly, that it represents the future trend and has the power to change the world for the convenience and flexibility it brings to us. Just as the old Chinese saying goes, the defects cannot obscure the virtues of a splendid jade, and I assume it also applies to the sharing economy.
