2016年12月大学英语六级真题第3套

Part I Writing

30 minutes)（请于正式开考后半小时内完成该部分，之后将进行听力考试）

Directions: For this part, you are allowed 30 minutes to uwrie ashort ssay on creation. Your ssay should include the importance of creation and measures to be taken to encourage creation. You are required to write at least 150 words but no more than 200 words.

请用黑色签字笔在答题卡1指定区域内作答作文题，在试题册上的作答无效! 请认真填写以下信息

准考证号

姓名

错填、未填以上信息，按违规处理!

特别说明

六级考试每次仅考两套听力

第三套听力试题同第一套或第二套试题一致

Part III Part II[

Reading Comprehension

(40 minutes)

Section A

Directions: h ths section, there isa passage with ten blanks. You are required to select one wordfor each blank from a list of choices given in a word bank following he passage. Read the passage through carejully before making your choices. Each choice in the banh is identifed by a letter. Please mark the corresponding letter for each item on Answer Sheet 2 witha single line through the centre. You may not use any of the words in the bank more than

once. Once.

Questions 26 to 35 are based on the following passage.

Small communities, with their distinctive character — where life is stable and intensely human — are disappearing. Some have 26 _____ from the face of the earth, others are dying slowly, but all have 27 _____ changes as they have come into contact with an 28 _____ machine civilization. The merging of diverse peoples into a common mass has produced tension among members of the minorities and the majority alike.

The Old Order Amish, who arrived on American shores in colonial time, have 29 _____ in the modern world in distinctive, small communities. They have resisted the homogenization 30 _____ more successfully than others. In planting and harvest time one can see their bearded men working the fields with horses and their women hanging out the laundry in neat rows to dry. Many American people have seen Amish families, with the men wearing broad-brimmed black hats and the women in long dresses, in railway or bus 31 _____. Although the Amish have lived with 32 _____ America for over two and a half centuries, they have moderated its influence on their personal lives, their families, communities, and their values.

The Amish are often 33 _____ by other Americans to be relics of the past who live a simple, inflexible life dedicated to inconvenient out-dated customs. They are seen as abandoning both modern 34 _____ and the American dream of success and progress. But most people have no quarrel with the Amish for doing things the old-fashioned way. Their conscientious objection was tolerated in wartime, for after all, they are good farmers who 35 _____ the virtues of work and thrift.

A. accssng	B. conveniences	C. destined	D. expanding
E. industrilized	F. pereived	G. ractie	H. poces
I. progress	J. respective	K. survived	L. erminals
M. undergone	N. universal	O. vanished	

Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Idenify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on Answer Sheet 2.

Countries Rush for Upper Hand in Antarctica

【A】 On a glacier-filled island with fords（峡湾）and elephant seals，Russia has built Antarctica's first Orthodox church on a hill overlooking its research base. Less than an hour away by snowmobile, Chinese labourers have updated the Great Wall Station, a vital part of China's plan to operate five bases on Antarctica, complete with an indoor badminton court and sleeping quarters for 150 people. Not to be outdone，India's futuristic new Bharathi base，built on sils（桩子）using 134 interlocking shipping containers, resembles a spaceship. Turkey and Iran have announced plans to build bases, too.

[B] More than a century has passed since explorers raced to plant their flags at the bottom of the world, and for decades to come this continent is supposed to be protected as a scientific preserve. shielded from intrusions like military activities and mining. But an array of countries are rushing to assert greater influence here, with an eye not just towards the day those protective treaties expire, but also for the strategic and commercial opportunities that already exist.

[C] The newer players are stepping into what they view as a treasure house of resources. Some of the ventures focus on the Antarctic resources that are already up for grabs, like abundant sea life. South Korea，which operates state-of-the-art bases here，is increasing its fishing of hrill（磷虾），found in abundance in the Southern Ocean, while Russia recently frustrated efforts to create one of the world's largest ocean sanctuaries here.

[D] Some scientists are examining the potential for harvesting icebergs from Antarctica, which is estimated to have the biggest reserves of fresh water on the planet. Nations are also pressing ahead with space research and satellite projects to expand their global navigation abilities.

[E] Building on a Soviet-era foothold, Russia is expanding its monitoring stations for Glonass, its version of the Global Positioning System(GPS). At least three Russian stations are already operating in Antarctica, part of its effort to challenge the dominance of the American GPS, and new stations are planned for sites like the Russian base, in the shadow of the Orthodox Church of the Holy Trinity

[F] Elsewhere in Antarctica, Russian researchers boast of their recent discovery of a freshwater reserve the size of Lake Ontario after drilling through miles of solid ice."You can see that we're here to stay,"said Vladimir Cheberdak, 57,chief of the Bellingshausen Station, as he sipped tea under a portrait of Fabian Gottlieb von Bellingshausen, a high-ranking officer in the Imperial Russian Navy who explored the Antarctic coast in 1820.

[G] Antarctica's mineral, oil and gas wealth are a longer-term prize. The treaty banning mining here, shielding coveted （令人垂涎的）reserves of iron ore，coal and chromium，comes up for review in 2048.Researchers

recently found himberlite（金伯利岩）deposits hinting at the existence of diamonds. And while assessments vary widely, geologists estimate that Antarctica holds at least 36 billion barrels of oil and natural gas.

[H] Beyond the Antarctic treaties, huge obstacles persist to tapping these resources, like drifting icebergs that could jeopardise offshore platforms. Then there is Antarctica's remoteness, with some mineral deposits found in windswept locations on a continent that is larger than Europe and where winter temperatures hover around minus 55 degrees Celsius. [] But advances in technology might make Antarctica a lot more accessible three decades from now. And even before then, scholars warn, the demand for resources in an energy-hungry world could raise pressure to renegotiate Antarctica's treaties, possibly allowing more commercial endeavours here well before the prohibitions against them expire. The research stations on King George Island offer a glimpse into the long game on this ice-blanketed continent as nations assert themselves, eroding the sway long held by countries like the United States, Britain, Australia and New Zealand.

[J] Being stationed in Antarctica involves adapting to life on the planet's driest, windiest and coldest continent, yet each nation manages to make itself at home. Bearded Russian priests offer regular services at the Orthodox church for the 16 or so Russian speakers who spend the winter at the base, largely polar scientists in fields like glaciology and meteorology. Their number climbs to about 40 in the warmer summer months. China has arguably the fastest-growing operations in Antarctica. It opened its fourth station last year and is pressing ahead with plans to build a fifth. It is building its second ice-breaking ship and setting up research drilling operations on an ice dome 13,422 feet above sea level that is one of the planet's coldest places. Chinese officials say the expansion in Antarctica prioritises scientific research, but they also acknowledge that concerns about " resource security" influence their moves.

[K] China's newly renovated Great Wall Station on King George Island makes the Russian and Chilean bases here seem outdated."We do weather monitoring here and other research,"Ning Xu，53，the chief of the Chinese base，said over tea during a fierce blizzard（暴风雪）in late November. The large base he leads resembles a snowed-in college campus on holiday break, with the capacity to sleep more than 10 times the 13 people who were staying on through the Antarctic winter. Yong Yu, a Chinese microbiologist, showed off the spacious building, with empty desks under an illustrated timeline detailing the rapid growth of China's Antarctic operations since the 1980s."We now feel equipped to grow,"he said.

[L] As some countries expand operations in Antarctica, the United States maintains three year-round stations on the continent with more than 1,000 people during the southern hemisphere's summer, including those at the Amundsen-Scott station, built in 1956 at an elevation of 9,301 feet on a plateau at the South Pole. But US researchers quietly complain about budget restraints and having far fewer icebreakers than Russia, limiting the reach of the United States in Antarctica.

[M] Scholars warn that Antarctica's political drift could blur the distinction between military and civilian activities long before the continent's treaties come up for renegotiation, especially in parts of Antarctica that are ideal for intercepting（拦截）signals from satelites or retasking satellte systems, potentially enhancing global electronic intelligence operations.

[N] Some countries have had a hard time here. Brazil opened a research station in 1984.but it was largely destroyed by a fire that killed two members of the navy in 2012, the same year that a diesel-laden Brazilian barge sank near the base. As if that were not enough, a Brazilian C-130 Hercules military transport plane has remained stranded near the runway of Chile's air base here since it crash-landed in 2014.

[O] However, Brazil's stretch of misfortune has created opportunities for China, with a Chinese company winning the $100 million contract in 2015 to rebuild the Brazilian station.

[P] Amid all the changes, Antarctica maintains its allure. South Korea opened its second Antarctic research base in 2014, describing it as a way to test robots developed by Korean researchers for use in extreme conditions. With Russia's help, Belarus is preparing to build its first Antarctic base. Colombia said this year that it planned to join other South American nations with bases in Antarctica.

[Q] "The old days of the Antarctic being dominated by the interests and wishes of white men from European, Australasian and North American states are over,"said Klaus Dodds, a politics scholar at the University of London who specialises in Antarctica."The reality is that Antarctica is geopolitially contested."

36. According to Chinese officials theiractivities in Antarctica lay greater emphasis on scientifi research.
37. Efforts to create one of the world's largest ocean sanctuaries failed because of Russia's obstruction.
38. With several monitoring stations operating in Antarctica, Russia is trying hard to counter America's dominance in the field of worldwide navigational facilities.
39. According to geologists' estimates, Antarctica has enormous reserves of oil and natural gas.
40. It is estimated that Antarctica boasts of the richest reserves of fresh water on earth.
41. The demand for energy resources may compel renegotiation of Antarctica's treaties before their expiration.
42. Many countries are racing against each other to increase their business and strategic influence on Antarctica.
43. Antarctica's harsh natural conditions constitute huge obstacles to the exploitation of its resources.
44. With competition from many countries, Antarctica is no longer dominated by the traditional white nations.
45. American scientists complain about lack of sufficient money and equipment for their expansion in Antarctica.

Section C

Directions: There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D).You should decide on the best choice and mark the corresponding leer on Answer Sheet 2 with a single line through the centre.

Passage one

Questions 46 to 50 are based on the following passage.

Any veteran nicotine addict will testify that fancy packaging plays no role in the decision to keep smoking. So, it is argued, stripping cartons of their branding will trigger no mass movement to quit. But that isn't why the government — under pressure from cancer charities, health workers and the Labour party — has agreed to legislate for standardised packaging. The theory is that smoking should be stripped of any appeal to discourage new generations from starting in the first place. Plain packaging would be another step in the reclssfication of cigarettes from inviting consumer products to narcotis （麻醉剂）.

Naturally, the tobacco industry is violently opposed. No business likes to admit that it sells addictive poison as a lifestyle choice. That is why government has historically intervened, banning advertising，imposing health warnings and punitie（惩罚性的）duties. This approach has led over time to a fall in smoking with numbers having roughly halved since the 1970s. Evidence from Australia suggests plain packaging pushes society further along that road. Since tobacco is one of the biggest causes of premature death in the UK, a measure that tames the habit even by a fraction is worth trying.

So why has it taken so long? The Department of Health declared its intention to consider the move in November 2010 and consulted through 2012.But the plan was suspended in July 2013.It did not escape notice that a lobbying firm set up by Lynton Crosby, David Cameron's election campaign director, had previously acted for Philip Morris International. (The prime minister denied there was a connection between his new adviser's outside interests and the change in legislative programme.) In November 2013,after an unnecessary round of additional consultation, health minister Jane Ellison said the government was minded to proceed after all. Now we are told Members of Parliament (MPs) will have a free vote before parliament is dissolved in March.

Parliament has in fact already authorised the government to tame the tobacco trade.MPs voted overwhelmingly in favour of Labour amendments to the children and families bill last February that included the power to regulate for plain packaging. With sufficient will in Downing Street this would have been done already. But strength of will is the missing ingredient where Mr. Cameron and public health are concerned. His attitude to state intervention has looked confused ever since his bizarre 2006 lamenl（叹惜）that chocolate oranges placed seductively at supermarket checkouts fueled obesity. The government has moved reluctantly into a sensible public health policy, but with such

obvious over-cautiousness that any political credit due belongs to the opposition. Without sustained external pressure it seems certain Mr. Cameron would stil be hooked on the interests of big tobacco companies.

46. What do chain smokers think of cigarette packaging?

A. Fancy packaging can help to engage new smokers.

B. It has little to do with the quality or taste of cigarettes.

C. Plain packaging discourages non-smokers from taking up smoking.

D. It has little impact on their decision whether or not to quit smoking.

47. What has the UK government agreed to do concerning tobacco packaging?

A. Pass a law to standardise cigarette packaging.

B. Rid cigarette cartons of all advertisements.

C. Subsidise companies to adopt plain packaging.

D. Reclassify cigarettes according to packaging.

48. What has happened in Australia where plain packaging is implemented?

A. Premature death rates resulting from smoking have declined.

B. The number of smokers has dropped more sharply than in the UK.

C. The sales of tobacco substitutes have increased considerably.

D. Cigarette sales have been falling far more quickly than in the UK.

49. Why has it taken so long for the UK government to consider plain packaging?

A. Prime Minister Cameron has been reluctant to take action.

B. There is strong opposition from veteran nicotine addicts.

C. Many Members of Parliament are addicted to smoking.

D. Pressure from tobacco manufacturers remains strong.

50. What did Cameron say about chocolate oranges at supermarket checkouts?

A. They fueled a lot of controversy.

B. They attracted a lot of smokers.

C. They made more British people obese.

D. They had certain ingredients missing. Passage Two

Questions 51 to 55 are based on the following passage.

What a waste of money! In return for an average ofc44,000 of debt, students get an average of only 14 hours of lecture and tutorial time a week in Britain. Annual fees have risen from s 1,000 to 9,000 in the last decade, but contact time at university has barely risen at all. And graduating doesn't even provide any guarantee of a decent job: six in ten graduates today are in non-graduate jobs. No wonder it has become fashionable to denounce many universities as little more than elaborate con-richs（骗术）.Theres a lot for students to complain about the repayment threshold for paying back loans will be frozen for five years, meaning that lower-paid graduates have to start repaying their loans; and maintenance grants have been replaced by loans, meaning that students from poorer backgrounds face higher debt than those with wealthier parents. Yet it still pays to go to university. If going to university doesn't work out, students pay very little — if any— of their tuition fees back: you only start repaying when you are earning 21,000 a year. Almost half of graduates — those who go on to earn less — will have a portion of their debt written off. It's not just the lectures and tutorials that are important. Education is the sum of what students teach each other in between lectures and seminars. Students do not merely benefit while at university; studies show they go on to be healthier and happier than non-graduates, and also far more likly to vote. Whatever your talents, it is extraordinarily difficult to get a leading job in most fields without having been to university. Recruiters circle elite universities like zultures（兀鹰）.Many top firms will not even look at applications from those who lack a 2.1,i.e., an upper-second class degree, from an elite university. Students at university also meet those likely to be in leading jobs in the future, forming contacts for life. This might not be right, but school-leavers who fail to acknowledge as much risk making the wrong decision about going to university.

Perhaps the reason why so many universities offer their students so itle is they know studying at a top university remains a brilliant investment een if you don' learn anything. Studying at university will only become less attractive if

employers shift their focus away from where someone went to university — and there is no sign of that happening anytime soon. School-leavers may moan, but they have little choice but to embrace university and the student debt that comes with it.

51. What is the author's opinion of going to university?

A. It is worthwhile after all.

B. It is simply a waste of time.

C. It is hard to say whether it is good or bad.

D. It is too expensive for most young people.

52. What does the author say about the employment situation of British university graduates?

A. Few of them are satisfied with the jobs they are offered.

B. It usually takes a long time for them to find a decent job.

C. Graduates from elite universities usually can get decent jobs.

D. Most of them take jobs which dont require a college degree.

53. What does the author say is important for university students besides classroom instruction?

A. Making sure to obtain an upper-second class degree.

B. Practical skills they will need in their future careers.

C. Interactions among themselves outside the classroom.

D. Devloping independent and creative thinking abilities.

54. What is said to be an advantage of going to university?

A. Learning how to take risks in an ever-changing world.

B. Meeting people who will be helpful to you in the future.

C. Having opportunities of playing a leading role in society.

D. Gaining up-to-date knowledge in science and technology.

55. What can we infer from the last paragraph?

A. It is natural for students to make complaints about university education.

B. Few students are willing to bear the burden of debt incurred at university.

C. University education is becoming attractive to students who can afford it.

D. The prestige of the university influences employers'recruitment decisions.

Part IV Translation

(30 minutes)

Directions: For this par, you are alowed 30 minues to translate a passagefrom Chinese into English. You should write your answer on Answer Sheet 2. 农业是中国的一个重要产业，从业者超过3亿。中国农业产量全球第一，主要生产水稻、小麦和豆类。虽然中国的农业用地仅占世界的百分之十，但为世界百分之二十的人口提供了粮食。中国7700年前开始种植水稻。早在使用机械和化肥之前，勤劳和富有创造性的中国农民就已经采用各种各样的方法来增加农作物产量。中国农业最新的发展是推进有机农业。有机农业可以同时服务于多种目的，包括食品安全、大众健康和可持续发展。
