一、翻译原题与参考译文（汉译英）民间文学包含着人民群众鲜活、丰沛的思想感情，是民族核心价值观的有力彰显。中国民间文学向来肯定正直、善良、忠厚、诚实等品质，赞颂集体主义、爱国主义以及敢于担当、敢于斗争的精神，培育着中华民族的思想观念、人文精神和道德规范。

参考译文：Folk literature embodies the vibrant and profound thoughts and emotions of the people, serving as a powerful manifestation of a nation's core values. Chinese folk literature has consistently affirmed virtues such as integrity, kindness, loyalty, and honesty, while celebrating collectivism, patriotism, and the courage to assume responsibility and engage in struggle. It has played a crucial role in shaping the Chinese nation's ideological convictions, humanistic spirit, and ethical standards.

二、作文原题与范文题目：how to balance humility with ambitious

范文：Balancing Humility and Ambition in Career Development The perceived tension between humility and ambition stems from a false dichotomy. Humility anchors professionals in collaboration and self-awareness, while ambition fuels innovation and achievement. Integrating these traits creates a "humbitious" mindset essential for sustainable success—one that drives progress while maintaining ethical and interpersonal grounding.

Effective leaders exemplify this balance: A manager setting bold targets (ambition) yet actively seeking junior feedback (humility) boosts team engagement by 30%. Humility fosters trust through vulnerability, while ambition challenges complacency. For instance, a software engineer developing AI tools (ambition) who openly mentors peers (humility) elevates both personal impact and collective capability.

Align goals with broader missions—advancing industry standards or mentoring talent—to prevent ambition from devolving into self-interest.

Regular "ego audits" help recalibrate priorities. A marketing executive pursuing promotion for status (ambition) may realize it conflicts with work-life values (humility), prompting realignment.

Organizations can institutionalize balance through reverse mentorship—senior leaders learning tech agility from Gen Z employees while mentoring strategic thinking—bridging humility and ambition across generations.

Setbacks demand dual perspectives: A failed project becomes a growth opportunity when leaders analyze missteps with teams (humility) while refining strategies for future attempts (ambition). This approach accelerates recovery from setbacks by 40%, maintaining momentum without compromising integrity.

True career excellence transcends zero-sum choices. By fusing ambition's drive with humility's grounding, professionals achieve lasting impact—advancing personal goals while nurturing collaborative ecosystems. This synergy defines leaders who innovate without losing humanity, proving that success thrives where aspiration meets interdependence.

三、听力原文Section A: Working Memory (Mini-lecture) Good morning everyone. Today we're going to talk about working memory.

Okay. What is working memory? Uh, working memory is that part of our consciousness that we are aware of at any given time of day. In fact, you're doing it right now. It's not something we can turn off. If you turn it off, it's called a coma—loss of consciousness, right?

Now, working memory contains two main functions:

First, it stores a limited amount of knowledge.

Second, it allows us to reach back into our long-term memory and pull some of that in as we need, mix it, process it in light of whatever our current goal is.

Please note: The "current goal" isn't something like "I want to be the CEO of a big company" or "the top student in the class". It's more common. For example, "I'd like that biscuit" or "I need to figure out how to get to the railway station". So in a word, working memory capacity is our ability to take what we know and use it in ways that allow us to satisfy our current goals.

Section B: Interview (Part One) Woman: Good evening, everybody. Today we are delighted to have invited Alan Lee, a consultant in Silicon Valley, to discuss his latest book, Rest: Why You Get More Done When You Work Less. This book presents an empirical argument in favor of limited working hours and explores the benefits of active rest for enhancing creativity and productivity. Well, Alan.

Man: Thanks. I'm very pleased to meet you all.

Woman: Alan, what made you decide to write this book?

Man: I've been a consultant in Silicon Valley for about 20 years. A few years ago, after long-term projects, multitasking, and frequent travel, I started experiencing classic burnout symptoms. My initial response was to work harder, but during a sabbatical at the Blue Hill Research Center, I discovered that in three months, I accomplished an enormous amount of work and engaged in deep thinking—all while living what felt like an amazingly leisurely life.
