# 2018年6月大学英语六级考试试题第3套

## Part II Listening Comprehension *(30 minutes)*

## Part III Reading Comprehension

(40 minutes) In this section, there is a passage with ten blanks. You are required to select one word for each blank rom a list of choices given in a word bank following the passage. Read the passage through ca ully b oe making your choices. Each choice in the bank is ientied by a letter. lease mark the cor pondig letter for each item on Ansr Sh et 2 with a single line though the centre. You may not se any of the wors in the bank moe than once. Secion B In this section, you are going to read a passage with ten statements attached to it. Each statement contais information given in one of the paragraphs. enty the paragraph rom which the iformation derived. You may choose a pararaph more than once. Each paph marked with a letter. Answer the questios by marking the corresponding letter on Answer Sheet 2. juggkd the ones where I'd been accepted. City University of New York (CUNY), Rutgers University, and Indiana University were out of reach as were Mississippi State and the University of Alabama, where I would have to pay out-of-state fees. Further complicating my college search was a flourishing track careerI wanted to keep running but my times weren't quite fast enough to secure a scholarship. ie t i (t t t t s t [e online. Rated No. 466 overall on Forbes' Lists Top Colleges, No. 183 in Research Universities, and No. 108 in the South, I can't say it was my top choice. Still, the track coach had offered me a walk-on spot, and I actually found the urban Atlanta campus a decent consolation prize after New York City.

[E] While it may have been practical, it wasn't prestigious. But here's the thing: I loved tier() university. (I use the termlow-tiercautiously, because GSU is a well-regarded research institution that attracts high quality professors and faculty from all over the country.) We are taught to believe that only by going to the best schools and getting the best grades can we escape the rat race and build a better future. But what if lower-tier colleges and universities were the ticket to escaping the rat race? After all, where else can you leave school with a decent degreebut without a lifetime of debt?

[F] My school didn't come pre-packaged like the more popular options, so we were left to take care of ourselves, figuring out city life and trying to complete degree programs that no one was championing for us to succeed in. What I'm saying is, I loved my university because it taught us all to be resourceful and we could make what we wanted out of it.

[G] I was lucky enough to have my tuition covered by a lottery-funded scholarship called HOPE (Helping Outstanding Pupils Educationally). When I started college, the HOPE scholarship was funded by the state of Georgia and offered to graduating high school seniors with a GPA of 3.0 or higher. Living costs and books I paid for with money earned during high school, supplemented by a small college fund my deceased grandfather left for me and a modest savings accoun parents created when I was born.

[H] So what about all that name recognition? Sure, many of my colleagues and competitors have more glamorous alma maters () than I do. As a journalist, I have competed against NYU, Columbia, and Northeastern graduates for jobs. And yet, not a single interviewer has ever as me about my educational background. In fact, almost every interview I've ever had was due to a connection one that I've gained through pure determination, not a school brand. [1] According to The Boston Globe, students who earned their bachelor's in 2012 have an averag monthly loan payment of $312, which is one-third more than those who graduated in 2004. Ultimately, that's the thing universities don't want to admit. Private universities are money-making institutions. If you can afford to buy prestige, that's your choice. For the rest of us, however, our hearty lower-tiered universities are just fine, thank you.

[J] Wealthy universities talk up the benefits their name will give graduates: namely, strong alumni networks, star faculty, and a rsum boost. But you needn't attend an Ivy League school to reap those rewards. Ludacris and the former CEO of Bank of America Ken Lewis are alumni of my college, as well as VICE's first female editor-in-chief, Ellis

Jones. Successful people tend to be successful no matter where they go to school, and lower-tier schools can have alumni networks just as strong as their big name counterparts. In fact, lower-tier school alumni networks are arguably stronger, because fellow alumni recognize that you didn't necessarily have an easy path to follow. They might be more willing to offer career help, because your less famous school denotes that, like them, you are also full of energy and perseverance.

[K] The Washington Post reported on a recent study by Princeton economists, in which college graduates who applied to the most selective schools in the 12th grade were compared to those who applied to slightly less selective schools. They found that students with more potential earned more as adults, and the reverse held true as well, no matter where they went to school.

[L] Likewise, star faculty are not always found where you'd expect. Big name schools are not necessarily the best places for professors; plus, many professors split teaching time between multiple colleges and/or universities. This means, for instance, a CUNY student could reasonably expect to receive the same quality of instruction from a prestigious professor as they would if they were enrolled in the same class at NYU.

[M] It's possible that some hiring managers may be drawn to candidates with a particular educational rsum, but it's no guarantee. According to a 2012 survey described in The Atlantic, college reputation ranked lowest in relative importance of attributes in evaluating graduates for hire, beaten out by top factors like internships, employment during college, college major, volunteer experience, and extracurriculars.

[N] Maybe students who choose less prestigious universities are bound to succeed because they are determined to. I tend to think so. In any case, if I could do it again, I'd still make the same choice. Today I'm debt-free, resourcefuland I understand that even the shiniest packaging can't predict what you'll find on the inside.

36. Modest institutions can also have successful graduates and strong alumni networks.
37. The money the author made in high school helped pay for her living expenses and books at college.
38. The author came to see how costly college education could be when she was trying to choose a

university to attend. hee ae 2 pass es in this section. Each passage s followed by some questios or uninished statements. For each of them there are four choices marked A) , B) , C) and You should ecide on the best choice and mak the cor ponding letter on Ansr Sh et 2 wth a sig le line though the cetre. t ma o y a a s m average. However, that comparison omits other relevant factors: leisure time, life expectancy, and economic inequality. The French take longer vacations and retire earlier, so typically work fewer hours; they enjoy a higher life expectancy, presumably reflecting advantages with respect to health care, diet, lifestyle, and the like; and income and consumption are somewhat more equally distributed there than in the U.S. Because of these differences, comparing France's consumption with the U overstates the gap in economic welfare. Similar calculations can be used to compare the U.S. and other countries. For example, this calculation puts economic welfare in the United Kingdom at 97% of U.S. levels, but estimates Mexican well-being at 22%. The Jones-Klenow measure can also assess an economy's performance over time. According to this measure, as of the early-to-mid-2000s, the U.S. had the highest economic welfare of any large country. Since 2007, economic welfare in the U.S. has continued to improve. However, the pace of improvement has slowed markedly. Methodologically, the lesson from the Jones-Klenow research is that economic welfare is multi-dimensional. Their approach is flexible enough that in principle other important quality-of-life changes could be incorporatedfor exanple, decreases in total emissions of pollutants and declines in crime rate

46. What does the author think of the 2015 report by the Census Bureau?

A. It is based on questionable statistics.
B. It reflects the economic changes.
C. It evidences the improved welfare.
D. It provides much food for thought.

47. What does the author say about the Jones-Klenow method?

A. It is widely used to compare the economic growth across countries.

B. It revolutionizes the way of measuring ordinary people's livelihood.

C. It focuses on people's consumption rather than their average income.

D. It is a more comprehensive measure of people's economic well-being.

48. What do Jones and Klenow think of the comparison between France and the U.S. in terms of real consumption per person? A) It reflected the existing big gap between the two economies. B) It neglected many important indicators of people's welfare. C) It covered up the differences between individual citizens. D) It failed to count in their difference in natural resources.

49. What is an advantage of the Jones-Klenow method?

A. It can accurately pinpoint a country's current economic problems.

B. It can help to raise people's awareness of their economic well-being.

C. It can diagnose the causes of a country's slowing pace of economic improvement.

D. It can compare a country's economic conditions between different periods of time.

50. What cn we infer rom he passage about Americn people's economic well-being?

A. It is much better hn hat of heir Eropen contepts.

B. It has been on he decline ever since he n of he cent y

C. It has not improved as much as reported by he Census Bureau.

D. It has not been accurately assessed nd reported since mid-2000s.

Pasage Two Questios 51 to 55 re based on the ollowing passage. If you've ever s ted a sentence wih, " If I were you ... " or found yorself scratching yor head t a colleague's agony over a decision when he nswer is crystal-cler, here's a scientiic reason behind it. r own decision-mking abilities cn become depleted over he corse of he day causing indecision or poor choices, but choosing on behalf of someone else is n ejoyable task hat doesn't sufer he s me pitfalls. The problem is "decision aigue," a psychological phenomenon ht tkes a toll on he qualiy of yor choices aer a long day of decision mking, says Evn Polmn, a leading psychologist. Physicins who have been on he job or several hors, or ex mple, re more likely to prescribe ntibiotics to paients when it's unwise to do so. "Pres mably it's becuse it's simple nd easy to write a prescripion and consider a paient case closed rahr hn invesigate hr," Polmn says. But decision aigue goes awy when you re mking he decision or someone else. When people imagine hemselves as advisers nd imagine their own choices as belonging to someone else, hey eel less tired nd rely less on decision shortcts to mke hose choices. "By t ing pon he role of adviser raher hn decision mker, one does not sufer he consequences of decision atigue," he says. "It's as if hre's somehing n nd liberating about mking someone else's choice." Getting inpt rom ohers not only ofers a resh perspective nd thought process, it oten also includes riskier choices. While his sonds undesirble, t cn be quite good, says Polmn. " When people experience decision atigue-when hey re tired of mking choices-hey have a tendency to choose to go wih he (..) ," he says. "But he status quo cn be problematic, since a chnge in the course of action cn sometimes be mpo nt nd lead to a positive outcome." In order to achieve a successul outcome or rewrd, some level of risk is almost always essential. "People who re susceptible to decision aigue will likely choose to do nohing over somehing," he sys. "That's not to sy hat risk is awys good, but it is related to tking action, whereas decision atigue assredly leads to inaction nd he possible (•tJ!:·) of a decision mker who might oherwise preer a new corse but is unortunately hindered." Just because you cn mke good choices or ohrs doesn't men you'll do he same for yorself, Polmn cautions. "Reserch has ound hat women negotite higher salries or ohers hn hey do or hemselves," he says, adding ht people slip in nd out of decision roles. For this pat, you are allowed 30 minutes to taslate a passage rom Chinese into English. ou should write your aswer on Answer Sh et 2. For this part, ou are allowed 30 mintes to wrie an ssay on the mp otance of bug ust beween businesses and consumers. You can cite exames to illstrate your views. You sho l write at east 150 wors but no moe than 200 wo s.
