PART V READING COMPREHENSION

In this section there are four passages followed by questions or unfinished statements, each with four suggested answers marked A, B, C and D. Choose the one that you think is the best answer.

TEXT A After breakfast the boys wandered out into the playground. Here the day – boys were gradually assembling. They were sons of the local clergy, of the officers at the depot, and of such manufacturers or men of business as the old town possessed.

Presently a bell rang, and they all trooped into school. This consisted of a large, long room at opposite ends of which two under-masters conducted the second and third forms, and of a smaller one, leading out of it, used by Mr Watson, who taught the first form. To attach the preparatory to the senior school these three classes were known officially, on speech days and in reports, as upper, middle, and lower second. Philip was put in the last.

The master, a red-faced man with a pleasant voice, was called Rice; he had a cheerful manner with boys, and the time passed quickly. Philip was surprised when it was quarter to eleven and they were let out for ten minutes' rest.

The whole school rushed noisily into the playground. The new boys were told to go into the middle, while the others stationed themselves along opposite walls. They began to play Pig in the Middle. The old boys ran from wall to wall while the new boys tried to catch them: when one was seized and the mystic words said – one, two, three, and a pig for me – he became a prisoner and, turning sides, helped to catch those who were still free.

Philip saw a boy running past and tried to catch him but his limp gave him no chance; and the runners taking their opportunity, made straight for the ground he covered. Then one of them had the brilliant idea of imitating Philip's clumsy run. Other boys saw it and began to laugh; then they all copied the first; and they ran round Philip, limping comically, screaming with shrill laughter. They lost their heads with the delight of their new amusement, and choked with helpless merriment.

One of them tripped Philip up and he fell, heavily as he always fell, and cut his knee. They laughed all the louder when he got up. A boy pushed him from behind, and he would have fallen again if another had not caught him. The game was forgotten in the entertainment of Philip's deformity. Philip was completely scared. He could not make out why they were laughing at him. His heart beat so that he could hardly breathe, and he was more frightened than he had ever been in his life.

He stood still stupidly while the boys ran round him, mimicking and laughing; they shouted to him to try and catch them; but he did not move. He did not want them to see him run any more. He was using all his strength to prevent himself from crying.

82.

From the beginning of the passage we learn that _____

A. the school had only three classes.

B. the school only accepted day-boys.

C. some pupils came from the local area.

D. Philip's class was part of the senior school.

In the game Philip lost his ground because _____

A. the game wasn't fit for new boys like him.

B. the playground wasn't big enough for the game.

C. he did not know the rules of the game.

D. he could not run as quickly as other boys.

85.

What did the boys do after Philip lost his ground?

A. They continued with the game.

B. They stopped to make fun of" him.

C. They changed to another game.

D. They stopped and went inside.

86.

How did Philip feel in the end?

A. He was ashamed of himself.

B. He was very nervous.

C. He was really horrified.

D. He felt himself stupid.

TEXT B For parents who send their kids off to college saying, "These will be the best years of your life,"it would be very appropriate to add, "If you can handle the stress of college life."Freshmen are showing up already stressed out, according to the latest research study that reported students' emotional health levels at their lowest since the survey started in 1985. While in school, more students are working part-time and near-full-time jobs. At graduation, only 29 percent of seniors have jobs lined up.

Pressure to excel often creates stress, and many students are not learning how to effectively handle this stress. Let me share five facts that I believe every college student should know about stress.

First, stress can make smart people do stupid things. Stress causes what brain researchers call"cortical inhibition". In simple terms, stress hinders a part of tile brain responsible for decision-making and reaction time and can adversely affect other mental abilities as well.

Second, the human body doesn't discriminate between a big stressful event and a little one. Any stressful experience will create about 1,400 biochemical events in your body.

If any amount of stress is left unchecked, many things can occur within the body, including premature aging, impaired cognitive function and energy" drain.

Third, stress can become your new pattern. When you regularly experience negative feelings and high amounts of stress, your brain recognizes this as your normal state. This then becomes the new pattern, or baseline for your emotional state.

Fourth, stress can be controlled. Countless studies demonstrate that people can restructure their emotional state using emotion-refocusing techniques. These techniques help you recognize how you are feeling and shift to a more positive emotional, mental and physical state.

One technique involves slowing your thoughts and focusing on your heartbeat, breathing slowly and deeply, and focusing on the positive feeling that you receive.

Finally, stress can be lessened if you love what you study. Barbara Frederickson, a leading international authority on the importance of positive emotions, says humans are genetically programmed to seek positive emotions such as love and joy. It is suggested to choose a major or career path you love and enjoy. Otherwise, you could end up fighting against your own biology.

87.

The author cites the latest research study in order to show that _____

A. students are studying harder in college.

B. most students have part-time jobs now.

C. stress continues to the time of graduation.

D. students only feel stressed while in school.

88.

According to the passage, stress might cause all the following negative effects EXCEPT _____

A. social.

B. mental.

C. emotional.

D. physical.

89.

In the author's opinion, stress can be controlled by _____.

A. doing what you prefer

B. focusing on your emotional state

C. finding a more positive feeling first

D. identifying your present emotional state first

90.

According to the context, what does "your own biology" mean in the last paragraph?

A. Your current major.

B. Your preference.

C. Your future research.

D. Your future job.

91.

Which of the following is the best as the title of the passage?

A. Causes of Stress.

B. Types of Stress.

C. College Life and Stress.

D. Stress and Control Methods.

TEXT C For anyone who doubts that the texting revolution is upon us, consider this: The average 13-to 17-year-old sends and receives 3,339 texts a month – more than 100 per day, according to the Nielsen Co, the media research firm. Adults are catching up.

People from age 45 to 54 sent and received 323 texts a month in the second quarter of 2010, up 75% from a year ago, Nielsen says.

Behind the texting explosion is a fundamental shift in how we view our mobile devices. That they are phones is increasingly beside the point.

Part of what's driving the texting surge among adults is the popularity of social media. Sites like Twitter, with postings of no more than 140 characters, are creating and reinforcing the habit of communicating in micro-bursts.

Economics has much to do with texting's popularity. Text messages cost carriers less than traditional mobile voice transmissions, and so they cost users less. Sprint Nextel has reconceived its Virgin Mobile brand to cater to heavy texters in a difficult economy. For $25 per month, users get unlimited texting, email, social networking and 300 talk minutes; for another $15, they get an additional 900 talk minutes.

The name of the brand's new wireless plan: "Beyond Talk."Texting's rise over conversation is changing the way we interact, social scientists and researchers say. We are now inclined to text to relay difficult information. We stare at our phone when we want to avoid eye contact. Rather than make plans in advance, we engage in what researchers have named "micro-coordination" – "I'll txt u in 10 rains when I know wh/restrnt. "Texting saves us time, but it steals from quiet reflection.

"When people have a mobile device and have even a little extra time, they will communicate with someone in their life,"says Lee Rainie, Director of the Pew Internet and American Life Project.

And the phone conversation will never be completely out. Deal makers and other professionals still spend much of the day on the phone. Researchers say people are more likely to use text-based communication at the preliminary stages of projects.

The phone comes into play when there are multiple options to consider or important decisions to be made.

92.

At the beginning of the passage, the author uses figures for the purpose of _____

A. introduction.

B. comparison.

C. explanation.

D. transition.

93.

According to the context, which of the following is closest in meaning to"beside the point"?

A. Unimportant.

According to the passage, texting can help people to _____

A. lace difficult situations.

B. avoid awkward situations.

C. communicate with strangers.

D. make appointments in advance.

96.

What is the passage mainly about?

A. Texting's popularity and effect.

B. Role of texting in business.

C. Preference to texting over thinking.

D. Innovation of mobile devices.

TEXT D The healthy adolescent boy or girl likes to do the real things in life, to do the things that matter.

He would rather be a plumber's mate and do a real job that requires doing than learn about hydrostatics sitting at a desk, without understanding what practical use they are going to be. A girl would rather look after the baby than learn about child care. Logically we should learn about things before doing and that is presumably why the experts enforce this in our educational system. But it is not the natural way – nor, I venture to think, the best way.

The adolescent wants to do things first for only then does he appreciate the problems involved and want to learn more about them.

They do these things better in primitive life, for there the adolescent boy joins his father in making canoes and going out fishing or hunting. He is serving his apprenticeship in the actual accomplishments of life. It is not surprising that anthropologists (人类学家) find that the adolescents of primitive communities do not suffer from the same neurotic (神经质的)"difficulties" as those of civilized life.

This is not, as some assume, because they are permitted more freedom, but because they are given more natural outlets for their native interests and powers and allowed to grow up freely into a full life of responsibility in the community.

In the 19th century this was recognized in the apprenticeship system, which allowed the boy to go out with the master carpenter or thatcher, to engage in the actual work of carpentry or roof-mending, and so to learn his trade. In some agricultural colleges at the present time young men have to do a year's work on a farm before their theoretical training at college.

The great advantage of this system is that it lets the apprentice see the practical problems before he sets to work learning how to solve them, and he can therefore take a more intelligent interest in his theoretical work.

Since more knowledge of more things is now required in order to cope with the adult world, the period of growing-up to independence takes much longer than it did in a more primitive community, and the responsibility for such education, which formerly was in the hands of the parents, is now necessarily undertaken by experts at school.

But that should not make us lose sight of the basic principle, namely the need and the desire of the adolescent to engage responsibility in the real pursuits of life and theft to learn how – to learn through responsibility, not to learn before responsibility.

97.

According to the author, what is the natural way of education?

A. Doing things while learning.
